

Richard Mellor- Chief of Manufacturing Engineering , Rolls-Royce Additive Layer Centre of Competence

Richard studied Mechanical Engineering at Loughborough University. After an early career in heavy engineering working on steam turbines, Banbury mixers and large reciprocating engines Richard moved in to Aerospace in 2004 joining Goodrich Engine Controls as Manufacturing Engineering Director. Seeking a way to speed up new product introduction Richard developed an interest in Additive Layer Manufacture and participated in a number of collaborative programmes. Following the purchase of part of the Engine Controls Business by Rolls-Royce Richard joined the Additive Layer Centre of Competence in 2014.
