

David Short

Dave was appointed as Technology Director covering BAE Systems Group activities in January 2018. This role involves looking at how BAE Systems are utilising technology across the company, how we can collaborate further both internally and externally and to also encourage an entrepreneurial spirit to develop new business opportunities.

Previously he has been Engineering Director Combat Air in Military Air & Information based at Warton, as the Engineering Authority for the Typhoon and Tornado products as well as Chief Engineer for F-35.

Dave is a Fellow of the Royal Aeronautical society, a Chartered Engineer and has an MSc in Systems Engineering from University College London.
